GUC ESG Policy

GUC has always thrived to reach the utmost economic and corporate growth within the IC industry. We value equality, recognize the importance of balancing stakeholders’ interests, and are not hesitant to implement corporate social responsibilities. This has allowed us to build a sustainable corporate culture amongst all GUC members and stakeholders.

Mission & Vision

● Innovative R&D
● Responsible Sourcing
● Green Management
● Friendly Workplace
● The common good of society

Guiding Principles

In the aspect of faithfulness and righteousness, GUC promotes integrity management and professional ethics. We aim to balance the interests of all stakeholders, and wish to activate a positive cycle in the industry; this of which may allow us to serve as an uplifting force for society.

In regard to environmental protection, GUC dedicates itself to environmental sustainability. We insist on utilizing green designs and green supply chains, seek to reach highest
resource efficiency, and aim to meet the waste reduction and pollutant avoidance targets.

In terms of social awareness, GUC combines its corporate resources with employee volunteer services, and commit money, materials and labor to two main areas: “environmental protection” and “rural area / vulnerable groups.” GUC hopes to promote a sustainable environment, and to offer vulnerable groups necessary aid and emergency relief, in hopes of establishing a society of good faith.
